Profile

Hi- I'm Thomas. I am 26 years old, born coder. I'm a full-stack web developer specialized in Python/Django. I got 0 and 1 running through my veins, I love solving problems and always eager to learn new things.

I studied finance-banking after my high-school diploma in CS. I have since found an unbridled passion for web development, of all things.

JavaScript, Angular, Python, and Django are my focus now. I just completed a boot camp focused on Python, and would love to join your team.

I also love learning foreign languages: French, English, Chinese, and a little bit of Japanese.
